

[Screening Compounds](#) Our present compound collections (US and Abroad) exceeds 680,000+ reagents

[Chemical Building Blocks and Intermediates](#)

Our building blocks and intermediates, available from milligram to multi-gram amounts, can also be synthesized

[Reagents](#)

Fine chemicals, biotechnology reagents, buffers, natural products, separation technique products from

[Biotinylation Reagents & Labels](#)

PEG (discrete polyethylene glycol, dPEG™) crosslinkers, modification reagents and related products

[Plant Extracts](#)

Our database contains plants collected from various regions of the former USSR with about 2600 available

[Genipin](#)

An excellent natural cross-linker for proteins, collagen, gelatin, and chitosan cross-linking.

[Gossypol and Derivatives](#)

Gossypol is available for large-scale (1, 10, 100 kg) production at our facilities. Unique compounds c

[2-Chloro-4-nitro Imidazole](#)

2-Chloro-4-nitro Imidazole is available from stock in g/mg amounts and also for large scale synthesis

[PHOTOGEM®](#);

A medicinal preparation against cancer, photosensitizer PHOTOGEM®, the unique medication used

[COSMOSIL](#) and

[COSMOGEL](#) HPLC Columns and Packing MaterialsCOSMOS
