

The U.S. Army Research Laboratory, Weapons and Materials
Division, Aberdeen Proving Ground, MD intends to
negotiate with [TimTec, Inc.](#) Newark, DE for the
second phase of the Statement of Work Title: Development of
an Energetic Material Sensitivity Database.

This effort will maintain continuity of the original structure
and provides for further development and refinement of
the database software and input sensitivity data
available in the open literature as well as unpublished data. This
Statement of Work will be a one year effort
with further enhancements and refinements to the final database.
Interested persons may identify their interests
and capability. Information received will be considered only for
the purpose of determining whether to conduct a
competitive procurement. A determination by the Government to not
compete this proposed effort on a full and
open competitive basis, based upon responses to this notice is solely
within the discretion of the Government.
